

THE BEAST® 2460XP

24" Capacity Horizontal Grinder

The Beast® Model 2460XP will **out perform all other grinders** in its size class. The 2460XP is equipped with a 60" wide by 30" diameter cuttermill, a 60" wide by 24" mill opening. This machine uses a 30-tooth cuttermill running Bandit's **patented saw-tooth style cutterbodies** that regulate the size of the tooth's bite. Most of the material is sized in the initial cut, so material exits the large screening area quicker.

BUILT TO OUTPERFORM

The wide variety of tooth options that are available for the other Beast recyclers are available on the 2460XP, ensuring that you can produce the perfect product for your markets. It excels at processing larger diameter material, stumps and chunkwood.

DISCHARGE TO GREAT HEIGHTS

The discharge conveyor makes it easy to load open-top trucks or build large piles of chips and mulch. The two-stage belt conveyor consists of a 42"-wide primary belt that pulls everything from under the mill to the 3 speed secondary belt.

EASE OF ACCESS

The Model 2460XP is maintenance-friendly with easy access to wear items, and simple hydraulic and electrical systems. Screens are simple to change using the standard screen changing arm, and ladders, steps and handrails help operators feel secure while climbing and working on the machine. There is easy access to the mill for changing teeth and cutterbodies.

LIMIT DAMAGE FROM CONTAMINANTS

When encountering ungrindable contaminants, The Beast's patented cutterbodies and teeth are designed to absorb the shock of the blow, protecting the cuttermill and support arms. This limits the downtime for mill repairs to the time it takes to replace teeth and rakers. And the 2460XP, like every other one of The Beast horizontal grinders, has a unique waste gate that makes it easy to quickly remove of any contaminants from the mill and screening area, limiting damage to the mill and wear parts.

COMMITTED TO QUALITY & SERVICE

The Bandit Backbone™ Support

The Bandit Backbone is Bandit's commitment to customer service and support. It's always been a cornerstone of Bandit's philosophy, and today that backbone is stronger than ever. If you own a Bandit hand-fed chipper – regardless the age, hours, or warranty status – the Bandit Backbone is here to support you.

We Are Here to Support You

There are nearly 200 dealer locations in the US and 61 international dealers to support you. They are factory trained. Plus we have an experienced parts and service department supporting you and our dealers.

GO-ANYWHERE TRACK MOBILITY

Caterpillar steel track undercarriage can be added to the 2460XP. This feature allows it to travel over rough terrain not accessible by towable units. It also eliminates the need to forward or skid material to the 2460XP – the operator can take the chipper to the trees.

TEST OUR METAL

When you choose The Beast® Horizontal Grinder, you'll experience more uniform chip production, smoother and more efficient chipping, long-lasting components and improved fuel economy. We invite you to see for yourself by scheduling a demo with your nearest authorized Bandit dealer.
